

MailSite Fusion Messaging Server Tested And Verified For Use With The Apple iPad

MailSite Fusion synchronizes email, calendar and contacts over-the-air and without any additional software on the iPad

Campbell, CA – April 9th, 2010 – MailSite Software, Inc. announced today that it has completed testing and verification of the Apple iPad Mail, Calendar and Contact applications with MailSite Fusion. Using the built-in Exchange ActiveSync server, MailSite Fusion provides two way over-the-air synchronization of email, calendar and contacts with the Apple iPad without requiring any software to be installed on the device.

The tight integration between MailSite Fusion and Microsoft Outlook 2007 also provides [Apple iPad](#) users with a simple solution for instant, over-the-air synchronization between their iPad and their Outlook client. Unlike Apple's MobileMe, MailSite Fusion provides true end-to-end two-way push synchronization of email, calendar and contacts from Outlook to MailSite to iPad.

The [MailSite Fusion](#) email, calendar, contact and mobile sync platform is used by over 10 million people worldwide and provides a low-cost, reliable, easy-to-use alternative to Microsoft Exchange. With this latest verification, MailSite Fusion can claim to work seamlessly with all Apple mail, calendar and contact applications, as well as providing state-of-the-art email access via the [MailSite ExpressPro](#) web client.

For small businesses, MailSite Fusion SE runs on low-cost 32 bit servers and includes everything required for a messaging platform. MailSite Fusion SE does not require a dedicated server and requires basic Windows server administration skills to set up and manage. With licensing prices less than 50% of Microsoft Exchange 2007, small businesses now have a low-cost alternative.

For service providers, MailSite Fusion SP is field-proven to scale to over a million subscribers on a single cluster. This offers carriers and hosting companies a low cost and brand-able messaging platform with the opportunity for profit margins that are substantially higher than with Hosted Exchange 2007.

"More and more of our customers are using Apple devices for their preferred email client," said John Davies, President and CEO of MailSite, "so we are pleased to announce support for the iPad. This provides our business and service provider customers with comprehensive Apple device support including over-the-air two-way synchronization".

MailSite Fusion is available from MailSite Software, Inc. and from resellers around the world. MailSite Fusion SE starts at \$185 per year for 20 users. Anti-spam and anti-virus subscriptions will be available at additional cost. For more information or to download a free evaluation version visit [MailSite.com](#).
