

MAILSITE FUSION 9.4 KEEPS ONE STEP AHEAD OF SPAMMERS & SCAMMERS AND MINIMIZES ADMINISTRATION TIME

Latest Release Includes Automated Compromised Account Detection And Over-The-Air Two-Way Synchronization For Multiple Devices

Campbell, CA – May 17th, 2010 – MailSite Software Inc. today announced the availability of MailSite Fusion version 9.4, the latest release of the award-winning messaging and mobile synchronization server that is used by over 10 million people worldwide.

The [MailSite Fusion email, calendar, contact and mobile sync](#) software platform provides a low-cost, reliable, easy-to-use alternative to Microsoft Exchange. MailSite Fusion 9.4 continues the trend of keeping one step ahead of spammers and scammers by automatically detecting and preventing attempts to compromise email accounts. End users will also enjoy the ability to synchronize email, contact and calendar information over-the-air with multiple mobile devices, such as an [Apple iPhone](#) and an [Apple iPad](#).

Users of the state-of-the-art [MailSite ExpressPro web client](#) will enjoy the ability to search message headers in real time that is built into MailSite Fusion 9.4, as well as having greater control over message deletion policies.

The tight integration between MailSite Fusion and Microsoft Outlook 2007 and Outlook 2010 also provides users of the latest mobile devices such as [Apple iPad](#) and [Google Android](#) with a simple solution for instant, over-the-air synchronization between their mobile devices and their Outlook client. Using its native support for Microsoft ActiveSync, MailSite Fusion provides true end-to-end two-way push synchronization of email, calendar and contacts from Outlook.

For small businesses, MailSite Fusion SE runs on low-cost 32 bit servers and includes everything required for a messaging platform. MailSite Fusion SE does not require a dedicated server and requires basic Windows server administration skills to set up and manage. With licensing prices less than 50% of Microsoft Exchange 2007, small businesses now have a low-cost alternative.

For service providers, MailSite Fusion SP is field-proven to scale to over a million subscribers on a single cluster. This offers carriers and hosting companies a low cost and brand-able messaging platform with the opportunity for profit margins that are substantially higher than with Hosted Exchange 2007.

"In MailSite Fusion 9.4 we have continued to focus on two of the themes that our business and service provider clients tell us are their primary concerns: security and mobility." said John Davies, President and CEO of MailSite., continuing: " These enhancements not only help to ensure the best possible end user experience, but they also minimize the time and resource that businesses have to devote to administrating and maintaining their messaging services".

MailSite Fusion is available from MailSite Software, Inc. and from resellers around the world. MailSite Fusion SE starts at \$185 per year for 20 users. Anti-spam and anti-virus subscriptions will be available at additional cost. For more information or to download a free evaluation version visit [MailSite.com](#).
