**QUALCOMM's Eudora® Releases New WorldMail 3 Email Server Software, Powered by ROCKLIFFE.**

SAN DIEGO — May 10, 2005 — QUALCOMM Incorporated (Nasdaq: QCOM), pioneer and world leader in digital wireless technology today announced the availability of its Eudora WorldMail 3 email server software, which is powered by Rockliffe Incorporated's MailSite® email server technology. This long awaited new version of WorldMail will satisfy QUALCOMM's existing installed customer base, as well as offer a high performance email server solutions to new specific vertical markets including educational, governmental and enterprise users. The new version of Eudora WorldMail 3 is easy to install and maintain, and includes many new advanced security features, such as built-in anti-virus and anti-spam, support for Secure Socket Layer communication (SSL), Denial-of-Service protection and powerful content filtering for email policy enforcement. In addition, this new version includes Directory Harvest Attack (DHA) protection, inhibiting the theft of confidential email directory information that can net a spammer thousands of corporate email addresses in just a few minutes.

“WorldMail 3 combined with Eudora 6 with SpamWatch provides an integrated, powerful email software solution for all enterprise segments,” said Bill Ganon, vice president for QUALCOMM’s Eudora Products. “We evaluated many Windows-based email servers and selected Rockliffe based on their expertise, great quality of product and marketplace reputation for reliable, high-performance email servers.”

“We are very excited about this relationship,” said John Davies, president and CEO of Rockliffe. “Eudora WorldMail Server is a great brand and we are proud that MailSite technology will help further build its presence in the enterprise email market. We look forward to working with QUALCOMM to ensure that Eudora WorldMail Server continues to exceed the requirements of a fast-changing and demanding market.”

QUALCOMM Incorporated ([www.qualcomm.com](http://www.qualcomm.com)) is a leader in developing and delivering innovative digital wireless communications products and services based on the Company’s CDMA digital technology.
