He was awarded the OBE in 1994 for services to telecommunications.

Sam Nissim, Board Member

Dr Sam Nissim chairman of Nissim and Associates (NA). Formed in 1984, NA's primary activities involve incubation of high technologies. NA activities include forming entrepreneurial / intrapreneurial science and technology incubation and innovation parks, campuses and centers in the USA and UK and consulting services for nurturing, mentoring, assisting and supporting entrepreneurs to progress their vision to reality. Sam was educated as an engineer and directed R&D activities for several substantial US corporations before becoming an entrepreneur. As a pioneer in semiconductor technologies in Silicon Valley California, since the 1960's, Sam founded or co-founded a number of companies with leading high technology positions in their sectors, including Electronic Arrays, Inc., Monolithic Memories, Inc. and, in Singapore, Electronic Arrays (PTE) Limited. Sam was an active participant and innovator in the affairs of the American Federation of Information Processing Societies (AFIPS) and the Institute of Electrical and Electronics Engineers (IEEE). He is the holder of several patents. Sam received a Bachelor of Science degree from London University with First Class Honors.
